EXPERIENCE

UX Designer | NHN Global (FashionGo)

April 2025 - May 2026, Los Angeles, CA

- Led the redesign of FashionGo's Item Creation & Edit workflow, a core self-service experience for a B2B wholesale marketplace serving 1M+ buyers and 1,500+ vendors, from user flows and wireframes through high-fidelity design and implementation, reducing product upload time by approximately 40%.
- Designed and shipped an AI-assisted product description feature within the item creation workflow, helping vendors generate and refine listing content more efficiently.
- Simplified dense vendor workflows by reorganizing information hierarchy, required and optional fields, and key actions around vendors' primary tasks.
- Analyzed user behavior and workflow friction using Heap Analytics and qualitative feedback, translating findings into prioritized design improvements.
- Built AI-assisted HTML prototypes to explore workflow logic, interaction behavior, edge cases, and technical feasibility before development.
- Partnered with product managers and engineers through developer handoff and design QA, contributing interaction patterns to an established design system.

UX/UI Designer & Consultant | Orange Cube Art

October 2023 - Present, Seoul, South Korea / Remote

- Designed and built CUBO's responsive website in Figma and Framer, creating reusable components and CMS-driven templates to support consistent, scalable experiences across breakpoints.
- Provided structured UX, interaction, and visual design critiques to 20+ student teams while mentoring 14+ students across web, mobile, and interactive product concepts.

UX/UI Designer | Nomadic

August 2022 - October 2022, Los Angeles, CA

- Designed and delivered 15+ production-ready screens for an iOS travel app in 12 weeks, developing user flows, wireframes, high-fidelity interfaces, and interactive prototypes in Figma.
- Iterated the onboarding experience based on user research and usability testing, collaborating with engineers through implementation.

SELECTED PROJECTS

ORBIT | Autonomous Fleet Supervision Interface

2026, Self-Directed Concept Project

- Designed a human-in-the-loop supervision interface for autonomous robot fleets, structuring monitoring, incident detection, intervention, verification, and return-to-autonomy states to support situation awareness and calibrated trust.
- Applied Human Factors research to define interaction requirements, user flows, automation states, and intervention patterns.

Sinergy | AI-Assisted Collaborative Workspace

2024, Self-Directed Concept Project

- Designed an AI-assisted collaborative workspace that transforms early project context into structured prompts through guided setup, automated prompt generation, and conversational follow-up guidance.
- Grounded the concept in user interviews and a prompt-specificity experiment, using findings to shape information architecture and user flows, then validating Figma prototypes through usability testing.

EDUCATION

ArtCenter College of Design | B.S. in Interaction Design

August 2020 - April 2024

- GPA 3.80 • Graduation with Distinction • ArtCenter Undergraduate Scholarship Recipient

Fullerton College | A.S. in Architecture

August 2017 - May 2020

- GPA 3.91

SKILLS

Product & Interaction Design: Interaction Design • UX/UI Design • Product Design • User-Centered Design • Information Architecture • User Flows & Journeys • Workflow Redesign • Wireframing • High-Fidelity Design • Interactive Prototyping • Responsive Web & Mobile • Complex B2B & Enterprise Workflows

Research, Human Factors & Systems: User Research • Usability Testing • Heap Analytics • Data-Informed Design • Human Factors • Human-Machine Interaction (HMI) • Physical-Digital Interaction • Design Systems • Accessibility & Inclusive Design

AI & Prototyping: Claude • Claude Code • AI-Assisted Product Experiences • AI-Assisted Prototyping • Conversational UI • HTML/CSS Prototyping • Rapid Prototyping

Motion, 3D & Physical Prototyping: Motion & Micro-Interactions • After Effects • Cinema 4D • KeyShot • SolidWorks • Arduino • AutoCAD • SketchUp

Tools & Delivery: Figma • FigJam • Framer • Adobe Creative Cloud • Jira • Developer Handoff • Design QA • Product & Engineering Collaboration

Languages: Korean (Native) • English (Fluent)

CERTIFICATIONS

Human Factors & Usability Engineering Specialization Arizona State University, Sep 2026

Google Data Analytics Professional Certificate Google, Aug 2026

Embedded Interface Design Specialization University of Colorado Boulder, In Progress
